

Assignment 1

For this assignment you are going to create a .html file. This html should have a proper boilerplate format as discussed in lecture video. The boilerplate will have the doctype, html, and head. The head will contain the three meta element tags with the text definition, the compatible attribute, viewport and the title.

The body of the html should have a h1 header with your name, a h2 header with the your year of college and your major. After the headers you should have a p1 paragraph that will contain a short paragraph about you. The paragraph can have anything to the things you like to do, where you are from, why you chose your major, or your favorite movie you recently watched.

The last part of the assignment is to take a picture of yourself and add the image with img to your document.

The assignment should be turned in by its due date to canvas as a submitted .html document. Any document type other than html will not be graded.

20 points: correct boilerplate with the proper layout

20 points: correct body with h1, h2, and p1

10 points: image of yourself
