

HTML/CSS Assignment 2

For this assignment you are required to design your own webpages using some of the CSS that was discussed in this week's lecture video. You will be given a list of items that your webpages should contain. Your grade for this week will be based on design and the completion of all the requirements given.

You will pick a subject to create a webpage about. This subject can be movies, sports, places to hang out, historical places, or places you have traveled. The choice of the theme and content is up to you. You will need to create at least three web pages. All three web pages will have a title in the boiler plate with your full name in it

The first web page will be a home page to navigate to all of the other webpages. On your homepage you will create a navbar with links to go to the other webpages. You will have an image on your homepage that is centered on the page. The image will be an image that represents your content.

The second web page must have an article of information on the content. You can find an article and use the content from that article. You are not expected to write an article. This will not be published so you do not need to worry about plagiarism. The content must be enough to fill two columns. The page also must have a background color instead of just white. The paragraphs must also contain a border of your choosing. You must have a navigation link to take you back to the homepage

The third page will contain a form to fill out information about a person. On the third page you must have one transition and one animation of your choosing. You also must have at least one button to bring up a alert. The entire background must be the same color as the second page. You must have a navigation link to bring you back to the homepage.

So the criteria for each page is:

Page one

Home page with navigation links

Image based on content

Title with your name

Second Page

Paragraph in two column format

Border on the columns

Back navigation link to the home page

Background color changed

Title with your name

Third Page

Form to fill out information about user

Transitions

Animations

Button with alert

Matching Background button

Back Navigation link to home page

Title with your name

When you have completed all webpages then you will zip up all three html along with the css and image into a folder named in your your pawprint and turned in on canvas by the due date. Any late assignments will be deducted 10% per day they are late.

This assignment will be worth 100pts
